

DURA HC Hydraulic Paint Sprayers

DURA HC range of airless spraying equipment, matches up reliability & productivity for medium to large size contracting projects. DURA HC Hydraulic airless sprayers are equipped with VEZOS - *Black Pump Series* - a hydraulic slow stroke pump with proven excellence over the years, eliminating classic electric sprayers disadvantages that cause downtimes while on the job.

• Unique Features

- Introducing hydraulic power to mid range
- High flow & standard series
- Tunnel cooling technology (VEZOS)
- Direct immerse pump or suction input
- Upright & compact design
- No electronic controls, hydraulic operation
- 177/230 bar working pressure
- High working pressure - more productivity
- Heavy duty airless paint sprayer
- No downtimes due to often service

• Materials

- Elastomeric coatings
- Primers
- Latex
- Acrylics
- Water based paints
- Block fillers
- Premixed plaster / texture
- Drywall mud
- Solvent based paints
- Spraying fillers

• Applications

- Medium to large interior coating
- Medium to large exterior coating
- Heavy duty applications
- Industrial coatings
- Maintenance jobs
